ABOUT ME

Motivated Junior Fullstack Software Developer with strong programming fundamentals and a focus on fronted development. Skilled in JavaScript, and modern frameworks like react. Quick learner, team-oriented, and committed to writing clean, maintainable code. Seeking to contribute to a dynamic team and grow through real-world challenges.

PROFESSIONAL EXPERIENCE

- **2024 - 2025**   **TRAINEE – MORINGA SCHOOL**
- Collaborated in a team of six to develop a full-stack web application as part of the Moringa School training program.
- Led a team in backend development by designing and implementing RESTful APIs using Flask.
- Built responsive user interfaces with React, Tailwind CSS, HTML, and CSS to enhance user experience.
- Managed application data using SQLite and ensured API reliability through thorough testing with Thunder Client and Postman.
- Utilized Git for version control and practiced agile methodologies to maintain effective team collaboration.
- Emphasized clean, maintainable code, application performance, and usability throughout the project lifecycle.

EDUCATION

- **2024-2025**   **MORINGA SCHOOL**

  Nairobi - Kenya
- Full-Stack Software Engineering Program

SKILLS SUMMARY

- Backend API development with Flask
- Frontend development using React, Tailwind CSS, HTML, and CSS
- Database management with SQLite
- API testing using Thunder Client and Postman
- Version control with Git
- Agile development and collaborative teamwork
- Writing clean, maintainable, and performant code
- Strong problem-solving, communication, and leadership abilities
