

BRIAN IRARU

SOFTWARE ENGINEER

brian.o.iraru@gmail.com | +254743435490 | Nairobi, Kenya

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with nearly 2 years of hands-on experience, including intensive training and collaborative project delivery. Strong programming fundamentals with a specialization in frontend development using React and modern JavaScript. Proven ability to lead backend API design, build responsive user interfaces, and manage application data with attention to performance, security, and accessibility standards.

Demonstrated success in agile, team-based environments—consistently delivering projects ahead of schedule through effective technical leadership and clean code practices. Recognized by technical mentors for writing highly readable, documented, and maintainable code used as reference examples for junior peers. Quick learner committed to solving real-world challenges, staying current with emerging technologies, and contributing to dynamic engineering teams that value collaboration and continuous improvement.

CORE COMPETENCIES

Frontend Development

React.js (Hooks, Context API, React Router, Custom Hooks) | Tailwind CSS | Material UI | Responsive & Mobile-First Design | State Management (Redux Toolkit basics, Context API) | HTML5 | CSS3 | JavaScript (ES6+) | Typescript | Performance Optimization (Lazy Loading, Code Splitting) | Chart.js for Data Visualization

Backend & API Development

RESTful API Design & Implementation | Flask (Python) | Express.js (Node.js) | JWT Authentication & Authorization | API Documentation (Swagger/OpenAPI basics) | Third-Party API Integration (Weather, Aviation, Movie APIs)

Database Management

SQLite | PostgreSQL | MySQL | Query Optimization & Indexing | Database Schema Design | SQLAlchemy ORM | Prisma basics

Testing & Quality Assurance

Postman | Thunder Client | Insomnia | Unit Testing (Jest, PyTest basics) | API Reliability Testing | Debugging & Error Handling

Version Control & DevOps

Git (Feature Branching, Merging, Rebase) | GitHub Actions (CI/CD basics) | Vercel Deployment | Netlify Deployment | Render Deployment | Environment Configuration

Soft Skills & Methodologies

Agile/Scrum (Daily Stand-ups, Sprint Planning, Retrospectives) | Technical Leadership & Team Coordination | Peer Code Reviews | Problem-Solving | Effective Communication | Time Management

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Trainee)

Moringa School | Nairobi, Kenya

November 2024 – May 2025

.Selected for an intensive full-stack software engineering program with an acceptance rate of less than 15%. Developed production-grade web applications while collaborating in agile teams of 4–6 developers, taking a leading role in backend architecture and frontend implementation. Designed and implemented 12+ RESTful API endpoints using Python and Flask, supporting complex CRUD operations, user authentication, and real-time data synchronization. Improved code maintainability by reducing redundancy by 25% through modular design and middleware implementation, achieved 98% API test coverage using Postman and Thunder Client, and optimized database queries for datasets exceeding 500 records, reducing response times by 35%.

.Built 10+ responsive user interfaces using React.js and Tailwind CSS, creating reusable component libraries that accelerated development by 30%. Delivered applications with Lighthouse performance scores above 80 while ensuring seamless functionality across desktop, tablet, and mobile devices. Served as Backend Lead for a team of six developers, facilitating sprint planning, daily stand-ups, and retrospectives. Introduced a structured code review process that increased team velocity by 35% and reduced merge conflicts by 50%, while mentoring junior developers on Git workflows, API design principles, and React component architecture.

.Led the development of a production-ready Project Management Dashboard featuring drag-and-drop Kanban boards, JWT-based authentication, real-time updates, and role-based access control. Successfully coordinated a six-member development team to deliver the solution and received recognition for "Best Technical Execution" due to its strong architecture, functionality, and user experience.

TECHNICAL SKILLS MATRIX

Technical Skills: Frontend Development | React.js | TanStack Query | TypeScript | Tailwind CSS | CSS | Context API | Chart.js | API Integration | Weather API | Movie API | Aviation APIs | Backend Development | Python | Flask | REST APIs | JWT Authentication | Database Management | PostgreSQL | SQLite | SQLAlchemy | MySQL | Version Control & Deployment (Advanced) | Git | GitHub | Vercel | Testing & Debugging (Intermediate) | Postman | Thunder Client | UI/UX Design (Intermediate) | Figma | Responsive Design | Web Accessibility.

EDUCATION AND PROFESSIONAL TRAINING

Moringa School | Nairobi, Kenya

Full-Stack Software Engineering Program | 2024 – 2025

Completed an intensive 6months software engineering program focused on full-stack development, covering HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, React.js, TanStack Query, Python, Flask, SQL, SQLite, PostgreSQL, RESTful API development, Git, and Agile methodologies. Designed and delivered five major portfolio projects and over fifteen practical software development assignments, applying industry-standard software engineering practices throughout the development lifecycle. Ranked among the top 20% of the cohort based on technical assessments, project quality, problem-solving ability, and collaborative contributions. Earned a Certificate in Full-Stack Software Development, demonstrating proficiency in frontend development, backend engineering, database management, API integration, testing, version control, and application deployment.
